

ALEKSANDAR RADIŠIĆ

Backend Software Developer | .NET & Java

Belgrade, Serbia • +381 62 943 5891 • alekrad.private@gmail.com • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Backend Software Developer with 4+ years of professional experience designing and maintaining scalable enterprise systems across telecom, eCommerce, and CRM domains. Specialized in C#/.NET and Java/Spring Boot, with proven strength in REST API integration, legacy system modernization, and automated data workflows. Hands-on experience with microservices, message brokers (RabbitMQ, Apache Kafka), relational database optimization, and containerized deployments (Docker, Kubernetes). Prior mentoring and team-coordination experience; now pursuing senior and lead-level roles where I can drive technical direction and deliver reliable, maintainable distributed backend systems. Actively leveraging modern AI-assisted development tooling (Claude Code, Model Context Protocol) to accelerate delivery without compromising code quality.

TECHNICAL SKILLS

Languages: C#, Java, SQL, JavaScript

.NET Ecosystem: .NET 6/7/8, ASP.NET Core, Web API, Entity Framework, ADO.NET, LINQ, Blazor

Java Ecosystem: Spring Boot, Spring Framework, RESTful services

Databases: Microsoft SQL Server, PostgreSQL, MySQL; stored procedures, indexing, query optimization, schema design

Messaging & Integration: RabbitMQ, Apache Kafka, REST APIs, JSON, third-party API integration, ERP integration

DevOps & Tools: Docker, Kubernetes, Git, Bitbucket, CI/CD pipelines, IIS, Grafana, IBM QRadar

Architecture & Practices: Microservices, SOLID principles, design patterns, Clean Code, Agile/Scrum, code reviews, team mentoring

AI-Assisted Development: Claude Code, AI pair programming, prompt engineering, Model Context Protocol (MCP), generative AI tooling

Project Management: Jira, Confluence

PROFESSIONAL EXPERIENCE

CRM Software Developer

mts sistemi integracije | Belgrade, Serbia | Feb 2025 – Present

- Lead modernization of legacy CRM platform components, aligning the codebase with current .NET standards and industry best practices.
- Rewrote core backend modules, reducing code complexity and improving long-term maintainability by ~35%.
- Collaborated on optimizing SQL stored procedures and database schemas to support smoother CRM workloads and faster reporting.
- Extracted tightly-coupled functionality from outdated modules into cleaner, service-oriented components following SOLID principles.
- Restructured legacy code to integrate new relational tables, improving data handling efficiency and overall system reliability.

Software Developer

Elephant Solutions Group (incl. sister brand RedWood Digital) | Belgrade, Serbia | Nov 2021 – Feb 2025

- Designed, built, and integrated backend modules and third-party REST APIs into enterprise client applications, delivering new features to 500+ active users.
- Delivered backend integrations between internal ERP systems and BigCommerce storefronts, enabling real-time eCommerce operations for retail clients.
- Engineered background synchronization services processing 10,000+ product, stock, and pricing records daily, keeping storefronts continuously aligned with the ERP source of truth.
- Built provisioning APIs connecting DVB-C and IPTV systems in Java Spring Boot, ensuring reliable service delivery to 10,000+ telecom subscribers.

- Developed automation solutions for internal operations, including email and notification delivery, cutting manual data-entry time by 50%.
- Maintained and modernized multiple legacy codebases, reducing production error rates by ~40%.
- Designed and optimized local database storage structures to improve data accessibility and reduce read latency on critical lookup paths.
- Mentored junior developers and contributed to code reviews, project coordination, and Agile delivery; progressed from intern to Software Developer through consistent delivery.

EDUCATION

Bachelor's Degree in Information Technology Engineering

College of Applied Studies for Information Technologies (ITS), Belgrade | 2018 – 2021
